

GROUP NAME: WELL-BEING, ECONOMY AND ENVIRONMENT (ECOBIMA)

CODE: S70_23R

LINES OF RESEARCH

The ECOBIMA group conducts economic and environmental analyses of agriculture, livestock husbandry, and forestry. We examine policies related to the primary sector and its impact on ecosystems and the environment. We also investigate policies related to water resources and land use, and climate change mitigation and adaptation measures in the primary sector.

- Analysis of the primary sector and its impact on ecosystems and the environment
- Water resources management and nonpoint source pollution
- Climate change, droughts
- Agricultural policies, environmental policies, and collective action

NOTABLE PROJECTS

- RTA2017-00082-00-00. Sustainability of land and water use in agricultural activities; protection of ecosystems from drought and climate change (2018–2020).
- Real time Smart irrigation management at multiple stakeholders' levels (SMARTIES). PRIMA Section 2- Multitopic (2020-2023)
